

Find the number

What to do...

1. Write down your age.
2. What number must you multiply your age by to get as close as possible to 100?
3. Write down the multiplication.
4. Try this with someone else's age.
5. Repeat this several times
6. Look at all the multiplications - which person comes out nearest to 100?

$$5 \times 20 = 100$$

$$9 \times 11 = 99$$

Results

1. _____

2. _____

3. _____

4. _____
